Rhenier R. Gustilo

Software Engineer | AI Applications & Backend Development

Navotas City, Metro Manila, Philippines | rheniergustilo06@gmail.com
rhengtl.tech | github.com/RhenGTL | linkedin.com/in/rhengtl

SUMMARY

Computer Engineering graduate building AI applications, backend APIs and offline data flows with Python, TypeScript and PostgreSQL. Seeking permanent, full-time software engineering work.

SELECTED PROJECTS

ConTeX - AI-assisted page-to-LaTeX web app
Team of 4; led edge rebuild | 2025-26

- Rebuilt a Flask app on Cloudflare Workers: integrated Gemini conversion, user-scoped history and browser-side pdfTeX compilation, with pretrained OCR/formula-model fallback.
- Closed a prompt-injection path by separating uploaded bytes from model-request JSON; added TeX validation and automated failure/parity checks with GitHub Actions.

TindaBot - Offline restock planner with AI drafts
Personal project; sole developer | 2026

- Built a React/TypeScript PWA with an append-only IndexedDB event log and Supabase/PostgreSQL sync under row-level security; checked business rules against an independent Python reference model.
- Implemented an authenticated, rate-limited Gemini proxy for receipt/note drafts requiring user confirmation; verified generated figures against local records. Personal project; no store-owner outcome study.

EarPrompt - Speech-to-LLM coaching prototype
Thesis; team of 4; lead developer | 2025-26

- Integrated pretrained Silero VAD and SpeechBrain speaker verification with transcription, OpenAI and streaming speech APIs; built the Flask device API and most of the Flutter app.
- Instrumented per-stage latency: thesis evaluation averaged 3.8 s from partner speech-end to tip delivery over three sessions. Research prototype, without clinical validation.

EXPERIENCE

IT & Security Systems Intern - WJS Inc. (Webtek) | Jul-Sep 2025

- Deployed and troubleshot security/building systems and LAN infrastructure for hospitals, government sites and venues; prepared AutoCAD layouts, manuals and handover reports.

Technical Support Intern - RVCom Computer Trading | Jul-Sep 2024

- Resolved hardware and software issues for 20+ clients a week; kept service logs to track recurring faults.

Web Design Intern (Work Immersion) - DOST-PNRI | Mar-Apr 2022

- Redesigned and debugged government web-app UI components for accessibility before release.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL; Dart, Kotlin, C#
Backend & data: FastAPI, Flask, REST APIs, WebSockets, PostgreSQL/Supabase, Firebase, IndexedDB
AI & applications: OpenAI/Gemini APIs, pretrained speech/OCR integration, React, Flutter, WebAssembly
Quality & delivery: Vitest, Playwright, Python reference tests, Git, GitHub Actions, Vercel, Cloudflare, Render

EDUCATION

BS Computer Engineering, Machine Learning specialization
Polytechnic University of the Philippines | Sep 2026
President's Lister, 7 semesters; GWA 1.38 (1.00 highest on a 1.00-5.00 scale).

CERTIFICATIONS & TRAINING

Machine Learning with Python - freeCodeCamp Developer Certification (2026).
AWS Cloud Practitioner Essentials - course completion (2026); Kaggle Learn: Intermediate Machine Learning and Computer Vision - course certificates (2026).
